AMORE

PER LE SUPERFICI

AMORE: Per le Superfici
LOVE: for surfaces

This is more than just flooring it is an experience. The seamless design, the natural stone-like texture, and the unparalleled finish make him feel as if he is touching a piece of art.

He smiles, knowing that such elegance and sophistication can transform any space. In that moment, he realizes **true luxury begins from the ground up**, and these tiles define the very essence of premium living.

GREZZO

di AMORE

Elevating Every Surface

Since 1998, we have been at the forefront of tile manufacturing, crafting high-quality porcelain tiles that redefine industry standards. With four state-of-the-art manufacturing facilities, we produce an extensive range of porcelain tiles, from small formats to expansive slabs. Today, we take a leap forward in luxury with our ultra-premium tile collection: **GREZZO by AMORE**.

Introducing GREZZO – The Pinnacle of Elegance & Innovation:

GREZZO is not just a tile; it's a masterpiece of craftsmanship, design, and technology. Our latest offering, the 120x180cm ultra-luxurious porcelain tile, showcases an extraordinary fusion of innovation and artistry—introducing features never seen before in the industry.

Revolutionary Tile Composition:

Through Body Technology – Engineered for exceptional strength and durability, ensuring longevity in high-traffic areas.

LRHR Surface – LRHR stands for Low Reflection High Resistance. It is a special surface technology that minimizes glare while providing exceptional durability.

Advanced Digital Printing – Our cutting-edge digital technology enables unlimited design possibilities, including exquisite natural marble and slate patterns on full-body porcelain, a first-of-its-kind innovation in the industry.

A Game-Changer for Large Spaces:

Designed to meet the demands of modern architecture, **GREZZO** tiles solve the biggest challenges of large-scale commercial spaces. From malls, hospitals, and schools to high-traffic public places like metro stations and parking lots, these tiles offer unparalleled

GREZZO

THROUGH BODY

The Pinnacle of Elegance & Innovation

Strength & Consistency in Every Layer **Through body** tiles are designed for unmatched durability and aesthetic consistency. Unlike traditional glazed tiles, these tiles have colour and pattern running through their entire thickness, making chips and wear less noticeable over time. Ideal for high-traffic areas, through body tiles provide a seamless look that lasts for years. Their strength, combined with innovative textures and finishes, ensures they meet the highest architectural and design standards.

GREZZO De Amore: The Art Of Timeless Elegance

In the heart of luxury, where artistry meets innovation, Amore unveils its most exquisite creation—**GREZZO** de Amore. A collection born from an unyielding passion for perfection, it redefines the way we experience surfaces. Crafted for those who seek not just beauty but an experience that is both refined and enduring, **GREZZO** de Amore is an ode to elegance in its purest form.

Understanding GREZZO de Amore: Q & A Format

• WHAT IS GREZZO DE AMORE?

Grezzo de Amore is a premium collection of tiles by Amore, designed for elegance, durability, and high performance. It combines innovation and luxury to create an unparalleled surface experience.

• WHAT DOES LRHR STAND FOR?

LRHR stands for Low Reflection High Resistance. It is a special surface technology that minimizes glare while providing exceptional durability.

• WHY IS LOW REFLECTION IMPORTANT?

Low reflection reduces glare, creating a soft, elegant look. This enhances the depth and texture of the tile, making spaces feel more refined and luxurious under different lighting conditions.

• WHAT MAKES GREZZO DE AMORE HIGHLY RESISTANT?

The tiles are engineered to resist scratches, stains, and wear, making them perfect for high-traffic areas while maintaining their pristine beauty.

• IS GREZZO DE AMORE A HYGIENIC TILE OPTION?

Yes! The surface is hygienic, anti-bacterial, and anti-fungal, making it ideal for areas that require cleanliness and protection against germs.

• HOW DOES IT HANDLE STAINS AND CHEMICALS?

Grezzo de Amore is designed with stain and chemical resistance, ensuring that spills and cleaning products do not affect its appearance or durability.

• CAN THESE TILES WITHSTAND EXTREME WEATHER CONDITIONS?

Absolutely! They offer frost resistance and low water absorption, making them suitable for both indoor and outdoor applications, even in harsh climates.

• WHO DEVELOPED GREZZO DE AMORE?

A highly experienced team with over 40 years of expertise in tile design and craftsmanship has meticulously developed this exclusive surface to combine beauty with innovation.

• WHAT INSPIRES THE DESIGN OF GREZZO DE AMORE?

The collection draws inspiration from nature's raw beauty, capturing the essence of untouched stone, serene concrete, and velvety textures to create a harmonious and luxurious aesthetic.

• WHERE CAN GREZZO DE AMORE BE USED?

These tiles are perfect for lavish interiors, high-end commercial spaces, and sophisticated architectural projects, seamlessly blending contemporary elegance with durability.

Working with the various versions of Tiles

Cutting with diamond Discs

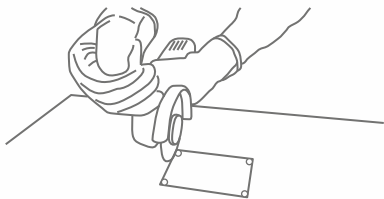

Our products can be cut using diamond discs fitted onto the hand-held electrical grinding machine. The speed of Disc rotation must be high (>10000 RPM) and should have a low feed rate (< 1 m/min). It may be required to cool the disc with water. Recommended discs are the thin types generally used for cutting porcelain stoneware. The surface should be kept on a FLAT base while cutting without any gap underneath

Drilling

You can use cutting discs fitted to battery-operated screwdrivers or angle grinders, electrical drills as an alternative.

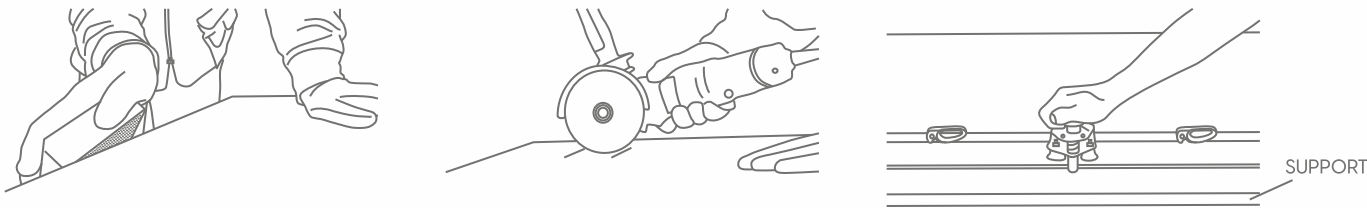

Internal cut / L - Shaped cut

To get internal and L-shaped corners & to reduce the risk of breakage, round o the vertex of the internal corner using bits with a radius of at least 5mm. Then cut with diamond discs, be cautious to stop moving the cutting tool forward. To drill and cut using diamond discs, follow the instructions provided above.

When using these tools:
-Cool the point being drilled with water
-Don't put too much pressure and bear in mind the resistance of the type of laminated stoneware you are working on
-If you are using tungsten bits, start drilling at a low speed
-If you are using drills or screwdrivers, do not select hammering mode

Edge - Finishing

Instructions for Manual Installation

SINGLE LAYER METHOD

DOUBLE-LAYER METHOD

COMPRESSING THE TILE

Important

All cutout corners must have a minimum diameter of 1/4".Never leave 90° angles.We recommend radiuses of more than 1/4" when the kitchen the design allows as it makes the countertop firmer.

Cleaning & Maintance

Our products are non porous (due to their high quality raw materials, stringent production parameters and state of the art technology), hence any dust or deposited waste cannot penetrate the surface.

For most cases only a damp cloth is sufficient for cleaning.

Regular cleaning highlights the aesthetic features of the surface and gives it exceptional shine.

For highly aggressive cleaning caused by some common food and substances follow the table below.

TYPE OF STAIN	CHEMICAL PRODUCT	EXAMPLE
Grease	Alkaline - Solvent	Detergent
Oil	Solvent	Ammonia, Backing Soda
Ink	Oxidant - Solvent	Alcohol, Liquid Bleach, Nail Paint Remover
Rust	Acid	Hydrochloric Acid, Vinegar, Red Harpic
Lime	Acid	Descaling Reagent, Hydro Chloric Acid
Cement	Acid	Hydro Chloric Acid
Wine	Alkaline	Ammonia, Liquid Bleach
Coffee	Alkaline - Solvent	Ammonia, Liquid Bleach
Rubber	Solvent	Alcohol, Thinner
Plaster	Acid	Hydro Chloric Acid
Candle Wax	Solvent	Alcohol, Thinner
Iodine	Oxidant	Liquid Bleach
Blood	Oxidant	Liquid Bleach
Ice Cream	Alkaline	Liquid Bleach

Note: It is recommended that any kind of stain needs to get clean immediately / as soon as possible.

Technical Specifications

	Regularity Characteristics:	Length and width $\pm 0,3$ (*)
		Thickness ± 5 (**)
		Straightness of sides $\pm 0,3$ (***)
		Rectangularity (Measurement only on short edges when $L/l \geq 3$)
		Surface flatness c.c. $\pm 0,4$ / e.c. $\pm 0,4$ / w. $\pm 0,4$
	Structural Characteristics:	Water absorption $E_v \leq 0,5\%$ Individual max 0,6%
	Bulk Mechanical Characteristics:	Breaking strength ≥ 1300 N for thickness $\geq 7,5$ mm
		Modulus of rupture $R \geq 35$ N/mm ²
		Impact resistance, as coefficient of restitution
	Surface Mechanical Characteristics:	Resistance to deep abrasion of unglazed tiles ≤ 175 mm ³ (Suitable for Conforme)
	Thermal and Hygrometric Characteristics:	Coefficient of thermal linear expansion ≤ 7 MKI
		Thermal shock resistance
		Moisture expansion (in mm/m) $\leq 0,01\%$ (0,1 mm/m) $\leq 0,01$
		Frost resistance
	Physical Properties:	Bond strength/adhesion for improved cementitious adhesives $\geq 1,0$ N/mm ² (Class C2 - EN 12004)
		Reaction to fire
	Chemical Characteristics:	Resistance to household chemicals and swimming pool salts
		Resistance to low concentrations of acids and alkalis
		Resistance to high concentrations of acids and alkalis
	Safety Characteristics:	Release of dangerous substances: Cadmium (in mg/dm ²) and Lead $\leq 0,01$ mg/dm ² Cd $\leq 0,1$ mg/dm ² Pb
		Shod Ramp Test
		Barefoot Ramp Test
		Coefficient of Friction (COF)
